

Abdullah Alkinani

Fisheries Scientist & Aquatic Ecologist

Corvallis, Oregon, USA · alkinana@oregonstate.edu · [ORCID: 0000-0003-3310-0668](https://orcid.org/0000-0003-3310-0668) · [Google Scholar](#) · [LinkedIn](#) · [GitHub](#)

Education

PhD, Fisheries, Wildlife, and Conservation Sciences — Oregon State University, Corvallis, Oregon. Expected 2027. Major advisor: Dr. Ivan Arismendi. Graduate committee: Dr. Jonny Armstrong, Dr. Mike Burns, Dr. Rebecca Flitcroft (Pacific Northwest Research Station, USDA Forest Service); Graduate Council Representative: Dr. Ha-Yeon Cheong. Research focus: ecological interactions among non-native Smallmouth Bass, native Signal Crayfish, and non-native Ringed Crayfish in Oregon river systems.

MEd, Gifted Education (*Summa Cum Laude*) — Flinders University, Adelaide, Australia, 2019–2021. Thesis: a statistical study of the effects of electronic games on gifted students.

BEd, Biology — King Khalid University, Abha, Saudi Arabia, 1994–1998. Project: survey of significant plant species of the Tihama and Asir regions.

Research and Professional Experience

Graduate Researcher — Oregon State University, Corvallis, Oregon. Present. Field and experimental research on freshwater invasions and predator–prey dynamics; pilot-phase laboratory predation and thermal-choice trials with video-based behavioral analysis; statistical analysis in R supporting conservation-relevant questions in the Willamette and Umpqua systems.

Lecturer and Trainer, Environmental Sustainability — Principles of Environmental Sustainability Program, Qunfudhah, Saudi Arabia. May 2012 – September 2017. Trained conservation professionals and park rangers in ecological assessment and wildlife management; delivered technical workshops on water quality monitoring; contributed to conservation work in the Wadi Hali region.

Biology Teacher — Ministry of Education, Makkah, Saudi Arabia. Since January 1999. Designed and taught inquiry-based biology curricula; integrated data analysis and spatial tools into classroom science; led development of an environmental science curriculum adopted by five regional schools; mentored students to regional and national science fair recognition.

Skills

Quantitative. R and RStudio, generalized and mixed-effects models, Jacobs' electivity index, GIS (ArcGIS Pro), SPSS, experimental design.

Behavioral and video analysis. BORIS behavioral coding, ToxTrac, Fiji/TrackMate, DeepLabCut.

Laboratory and field. Fish diet analysis, crayfish trapping and hand sampling, predator–prey and thermal-preference experimental design, water quality measurement (pH, dissolved oxygen, conductivity, nitrates),

taxonomy and species identification, microscopy, dissection and anatomical analysis, temperature logger deployment.

Reproducibility. Quarto, Git and GitHub, Zotero with Better BibTeX.

Teaching. Curriculum development, inquiry-based science teaching, STEM education, differentiated instruction, e-learning and virtual labs, scientific mentoring.

Languages. Arabic (native), English (fluent).

Certifications and Professional Development

- Inquiry-Based Teaching in Science (15 hours) — Educational Training Center
- Test Construction and Table of Specifications (15 hours) — Education Administration
- Differentiated Instruction and Active Learning (12 hours) — Education Office
- CoRT Thinking Skills Program (15 hours) — Education Office
- Research and Laboratory Safety Standards — International Academic Institution

Awards and Funding

Doctoral scholarship, Saudi Arabian Cultural Mission (SACM) and the Ministry of Education, Saudi Arabia — PhD study at Oregon State University.

Research Permits and Approvals

Fish and crayfish collection authorized under scientific take permits (NMFS Section 10–27264; ODFW 26416); animal handling conducted under OSU and OSU/USDA Forest Service Institutional Animal Care and Use Committee approvals (OSU IACUC 4379; OSU/USDA Forest Service 2023-0380).
